Is your CIO or CTO overwhelmed with maintaining your cybersecurity?

Cybersecurity, compliance and privacy regulations are now requiring companies to have specific personnel assigned to run their cybersecurity program. For small to medium sized businesses, this job many times is simply assigned to a current employee that isn't qualified and doesn't have the needed resources.

Hiring a new employee to fill this position caused many challenges.
- Time and cost to advertise and interview
- Lack of certified candidates
- Salary may be more than a business can afford
- Even qualified candidates are usually limited in experience to a specific industry

Virtual services fit the bill

Outsourcing these positions is completely acceptable according governing regulations. CyberCompass offers the guidance and expertise you need to manage your cybersecurity, compliance and privacy **at 1/3 the cost of a full time CISO**.

With our virtual team, you get
- Immediate relief for overworked employees
- Expertise across multiple industries
- A team of experts at your disposal
- Audit ready documentation and support
- Support to fix vulnerabilities across your entire business ecosystem
